

A READER'S GUIDE

How to read your mating analysis.

Each broodmare in the Chairman's Sale has been put through advanced pedigree models built by **G1 Goldmine** and **Stallion Match**. The report simulates the top ten hypothetical matings with commercial stallions standing in Australia and New Zealand — flagging high-potential crosses through stakes performance data, proven nicks, and complete pedigree evaluation.

WHY IT MATTERS

Built on a machine-learning engine that compares each mare's pedigree against millions of global race results, the report flags combinations that outperform expectation and matings that resemble known stakes winners. **Reduce risk. Identify upside.**

KEY INDICATORS

01	02	03	04
<h2>8x</h2> <p>PERFECT MATCH</p> <p>Mating is 8x more likely to produce a stakes winner.</p>	<h2>2.1x</h2> <p>20/20 MATCH</p> <p>Mating is 2.1x more likely to produce a stakes winner.</p>	 <p>IMPACT PROFILE</p> <p>Identifies specific ancestor crosses that have produced more — or fewer — stakes winners than expected on opportunity.</p>	 <p>SIMILARITY SCORE</p> <p>How closely the hypothetical mating resembles known stakes winners. Replication of success is key.</p>

STALLION CRITERIA

Find the right stallion.

All stallions standing in Victoria, New South Wales and New Zealand with a service fee of **\$27,500 or more**. Where available, 2026 service fees are shown in brackets next to the stallion name.

A TRUSTED COLLABORATION

A partnership between Inglis, Stallion Match, and G1 Goldmine — combining market-leading sale experience with the most advanced pedigree analysis tools available in the industry.
