Bhima Thoroughbreds

Lot number: 201

26/3/20

The above horse was examined today at the request of Bhima Thoroughbreds. The findings of a clinical examination were as follows:

- 1) Sound at the walk
- 2) Had normal hoof capsules and soles
- 3) Had no observable swellings - joint distension or otherwise
- 4) Had normal eyes & vision
- 5) Heart was in normal rhythm
- 6) Parrot mouth or hereditary defect was observed
 - Significant parrot mouth, upper left corner incisors (202 + 203) have been traumatized and displaced in the last week. On antibiotic treatment. These are the juvenile teeth and will be replaced.
- 7) Two descended testicles of adequate size were present.
