Chestnut colt

Brands: **NS:** Concentric circles **OS:** 17 over 8

Microchip: 985100012159604

A veterinary examination of the above horse was undertaken on 30/3/2020 at Edinglassie Stud, Muswellbrook at the request of Mr Michael Talty. The findings of this clinical examination were as follows:

- 1) No detectable lameness at a walk.
- 2) Had normal hoof capsules and soles.
- 3) No observable swellings – joint distension or otherwise. Joint palpation and flexion revealed no abnormalities.
- 4) Had normal eyes and vision.
- 5) Heart was in normal rhythm.
- 6) No severe parrot mouth or other hereditary defect observed.
- 7) No previous evidence of abdominal surgery, infection or ataxia were noted.
- 8) Both testicles were descended into the scrotum and of appropriate size.

Dr Trent Jorgensen B.V.Sc
