BROWN MARE 2014

The above mare was examined today. She has been at Fairview Park Stud since her last race start, arriving on the 20th April 2020. She is very good health and body condition. She is still shod with race plates however moves very freely and has good feet. She appears to possess a very workable temperament. I performed a breeding examination on her under sedation however she appeared to be very settled in the crush. Auscultation of her heart and examination of her eyes revealed no abnormality. Her height is approximately 16.1hh.

Please feel free to contact me regarding this mare.
