BAY MARE 2015

The above mare was examined today. She has been at Fairview Park Stud since the 23rd January 2020. She is very good health and body condition. She is not shod; she moves very freely and has good feet. She possesses a very workable temperament. I performed a breeding examination on her under sedation however she appeared to be very settled in the crush. Auscultation of her heart and examination of her eyes revealed no abnormality. Her height is approximately 16.0hh.

Please feel free to contact me regarding this mare.
