

**Lot No.** 20MJB 0523 **Farm** Stonehouse

**Breeding** Golden Edict 19 **Date** 30/6/20

Left Stifle	Lysis of lateral trochlear ridge, consistent with a likely healing OCD lesion. Low risk
Right Stifle	Mineralisation of soft tissue adjacent to the fibula. This is likely to be the start of "calcinosis circumscripta"; mineralised tissue which rarely causes lameness. It can be a cosmetic blemish. Low risk
Left Tarsus	No significant findings
Right Tarsus	No significant findings
Left Hind Fetlock	Small (2mm) dorsal fetlock chip. Low risk
Right Hind Fetlock	No significant findings
Left Front Fetlock	Mild lysis of lateral sesamoid, consistent with mild sesamoiditis
Right Front Fetlock	No significant findings
Left Carpus	No significant findings
Right Carpus	No significant findings
Left Front Foot	No significant findings
Right Front Foot	No significant findings
<b>Comments</b>	<b>Low risk</b>
