HORSE: TOO GOOD TOO HARD

MICROCHIP: 985100012104836

DATE: 28/6/2021

PLACE OF EXAMINATION: MILL PARK STUD

The mare was examined at the stud today. She was in excellent condition and was a recent metropolitan winner.

An endoscopic examination of her upper airway was performed via video endoscope, with a recording taken.

In my opinion, the mare has Grade 1 laryngeal function with excellent synchronous abduction, with excellent placement of the epiglottis.

A twitch was used during the examination but the mare was not sedated.

Regards,

Dr. Andrew R Hunt B.V.M.S., B.Sc., B.Rur.Sci(Hons)
